ABOUT THE COMPANY

Modern Systems for software development is a specialized establishment in IT industry will offer optimized business process and enhance the organization visibility for internal employees and external customers based on the organization strategies. Continuous process improvements is one from our expertise to help the organizations to grow.

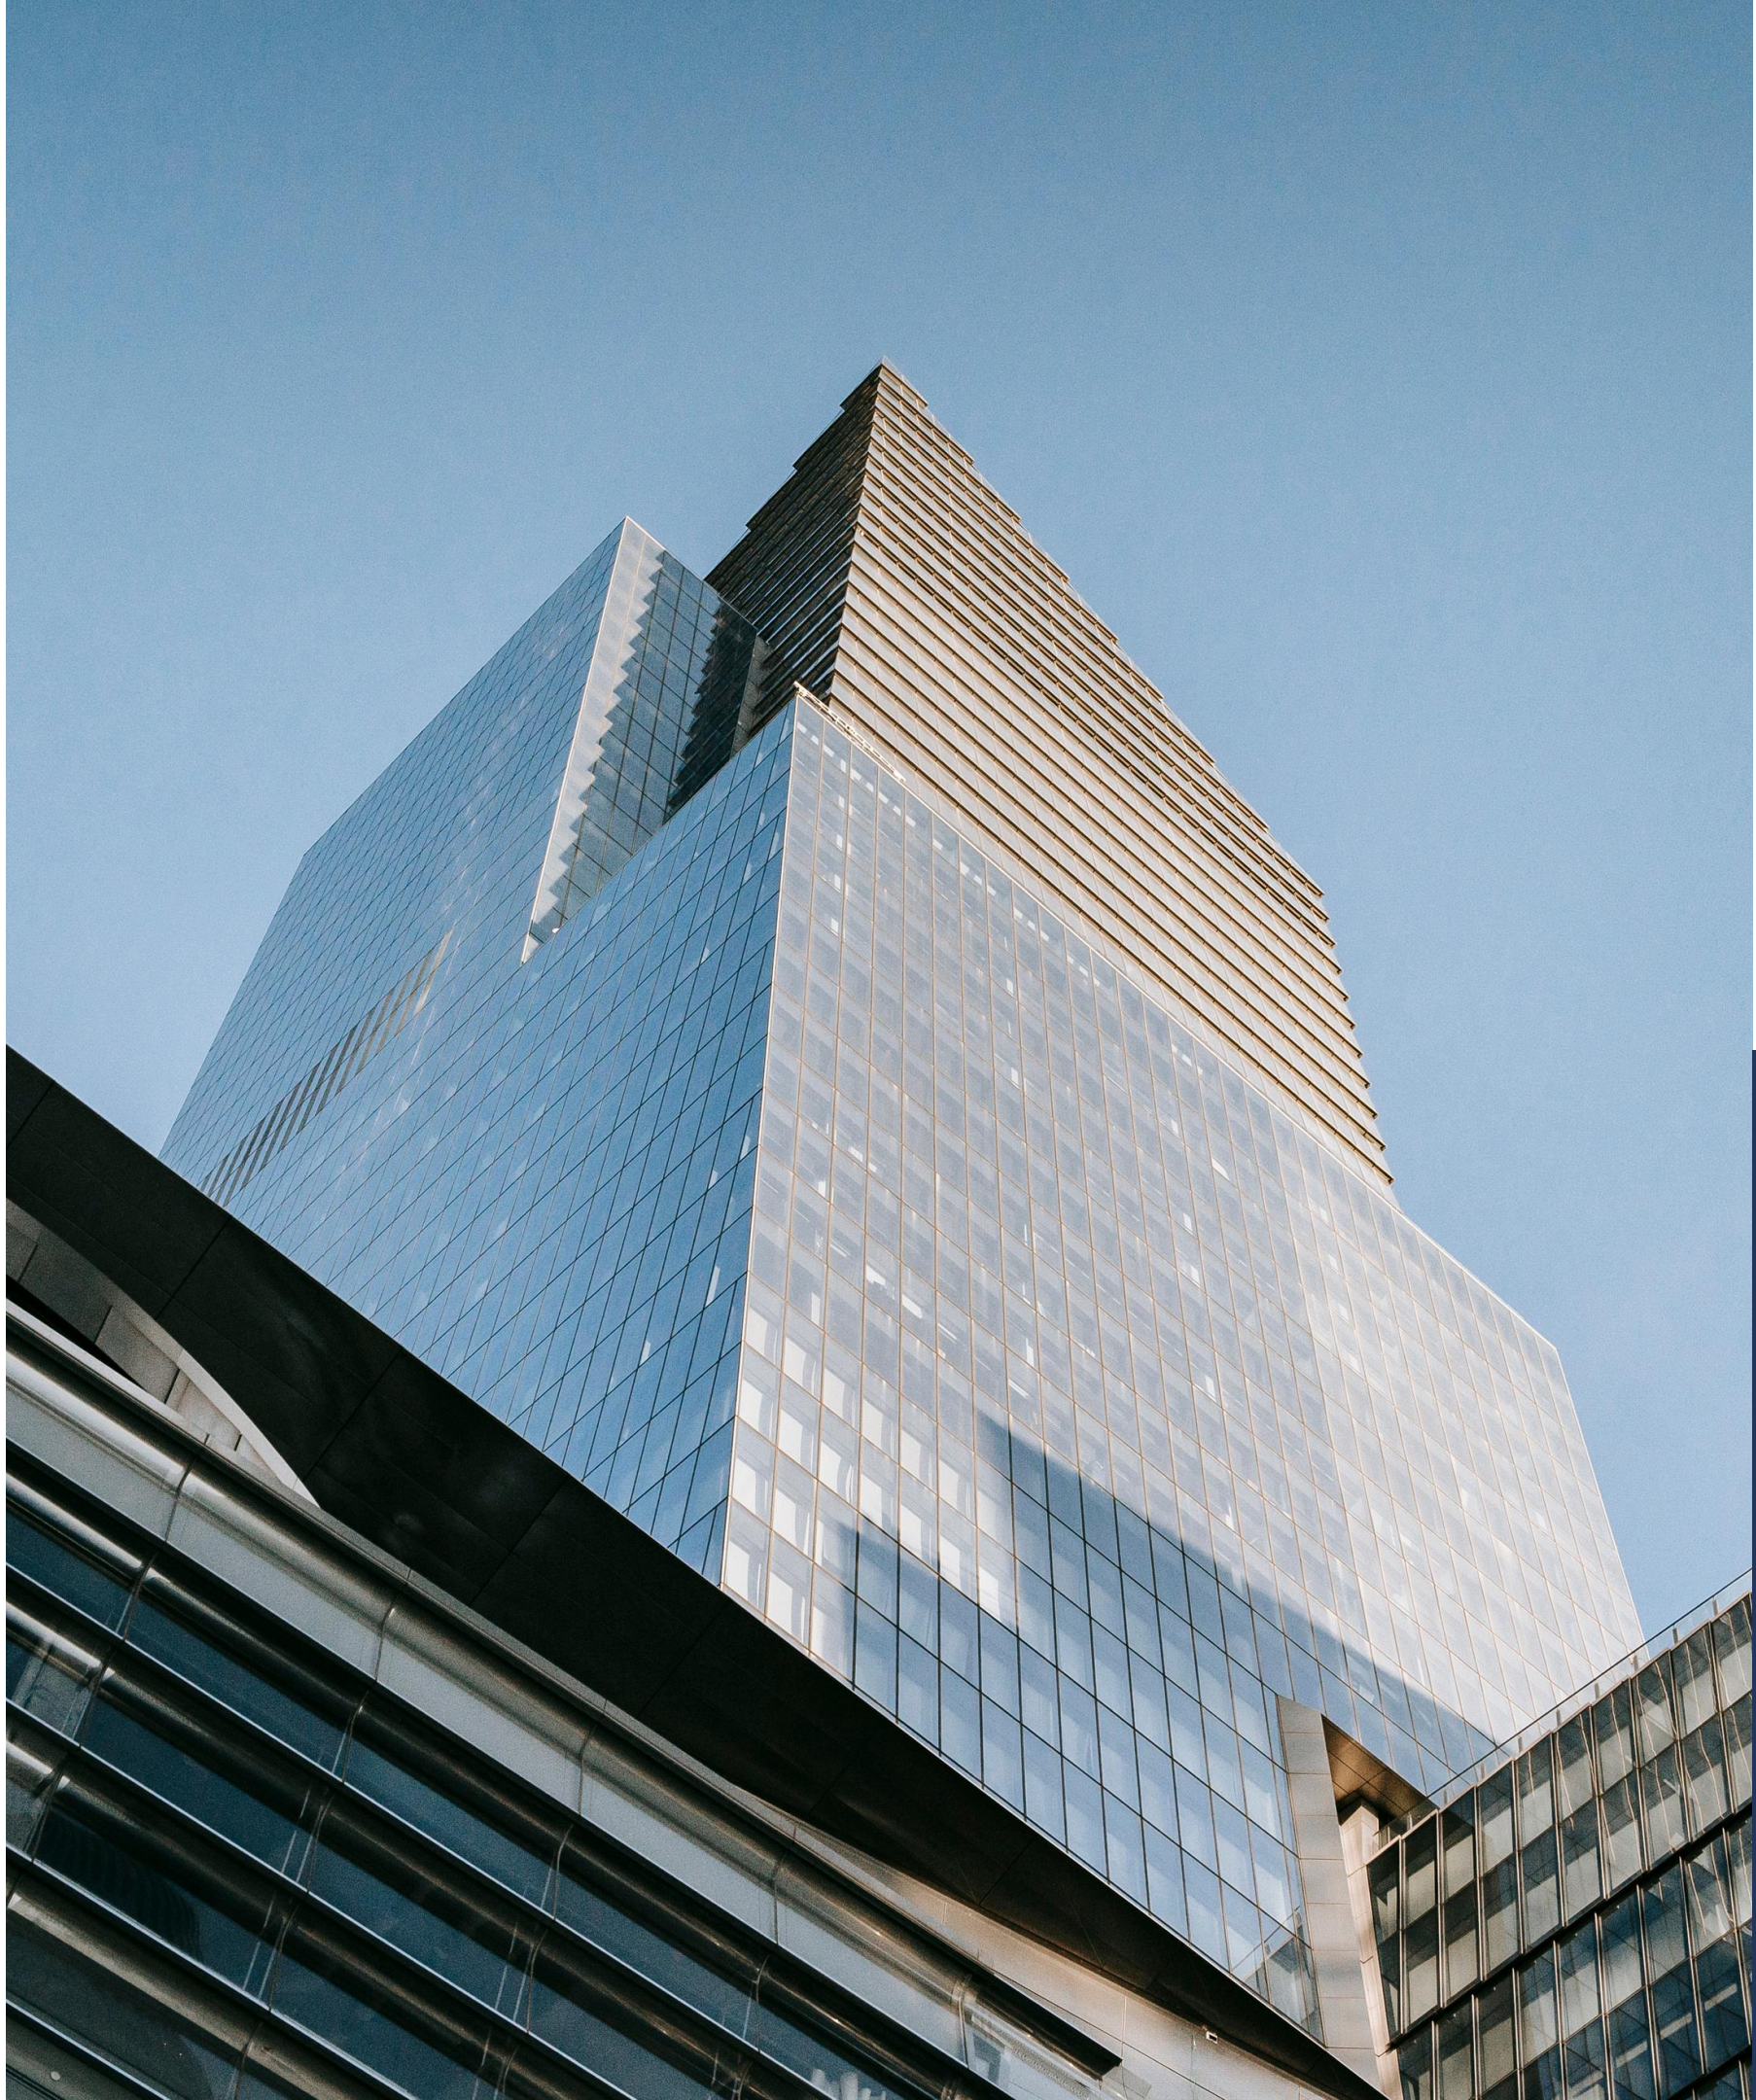

COMPANY PROFILE

OUR VISION

To be a global leader in delivering innovative software solutions and IT consultations, transforming businesses through cutting-edge technology and unparalleled expertise.

OUR MISSION

Our mission is to empower businesses by providing exceptional software development and IT consultation services both online and on-premise. We strive to deliver tailored solutions that enhance operational efficiency, drive growth, and foster technological excellence. Through our commitment to quality, integrity, and customer satisfaction, we aim to support our clients in achieving their strategic goals and navigating the complexities of the digital landscape.

KEY ACTIVITIES

The company engages in key activities such as understanding client requirements, designing software architectures, developing and testing code, ensuring quality through rigorous testing, deploying software solutions, and providing ongoing maintenance and support. The company also manages projects effectively, conducts research and development to innovate, creates comprehensive documentation, and offers consultation and training services. These activities collectively ensure the delivery of high-quality software solutions that meet client needs and drive technological advancement.

KEY PRODUCTS AND SERVICES

Modern Systems for Software Development provides a range of services, including ITIL and CMMI consultations, software development, and access to visit clinic through their online medical portal.

PRODUCT HISTORY

Visit Clinic began as a simple portal offering online pharmacy services. Over time, it evolved by adding more modules based on market needs and strategies, aiming to become the premier online medical portal. This growth has allowed it to serve a broader range of needs within the healthcare industry, enhancing its utility and reach.

Today, the portal includes an extensive array of systems such as human resources, pharmacy management, and doctor and clinic management. Each of these modules plays a crucial role in streamlining operations and improving efficiency for medical professionals. The integration of these systems ensures a seamless user experience, making Visit Clinic a comprehensive solution for healthcare management.

Additionally, Visit Clinic now features laboratory management, event management, computer store management, factory product catalogue management, medical health equipment management, IT service management, project management, and a medical product library. These offerings demonstrate the portal's commitment to providing a holistic approach to medical and healthcare services, meeting the diverse needs of its users.

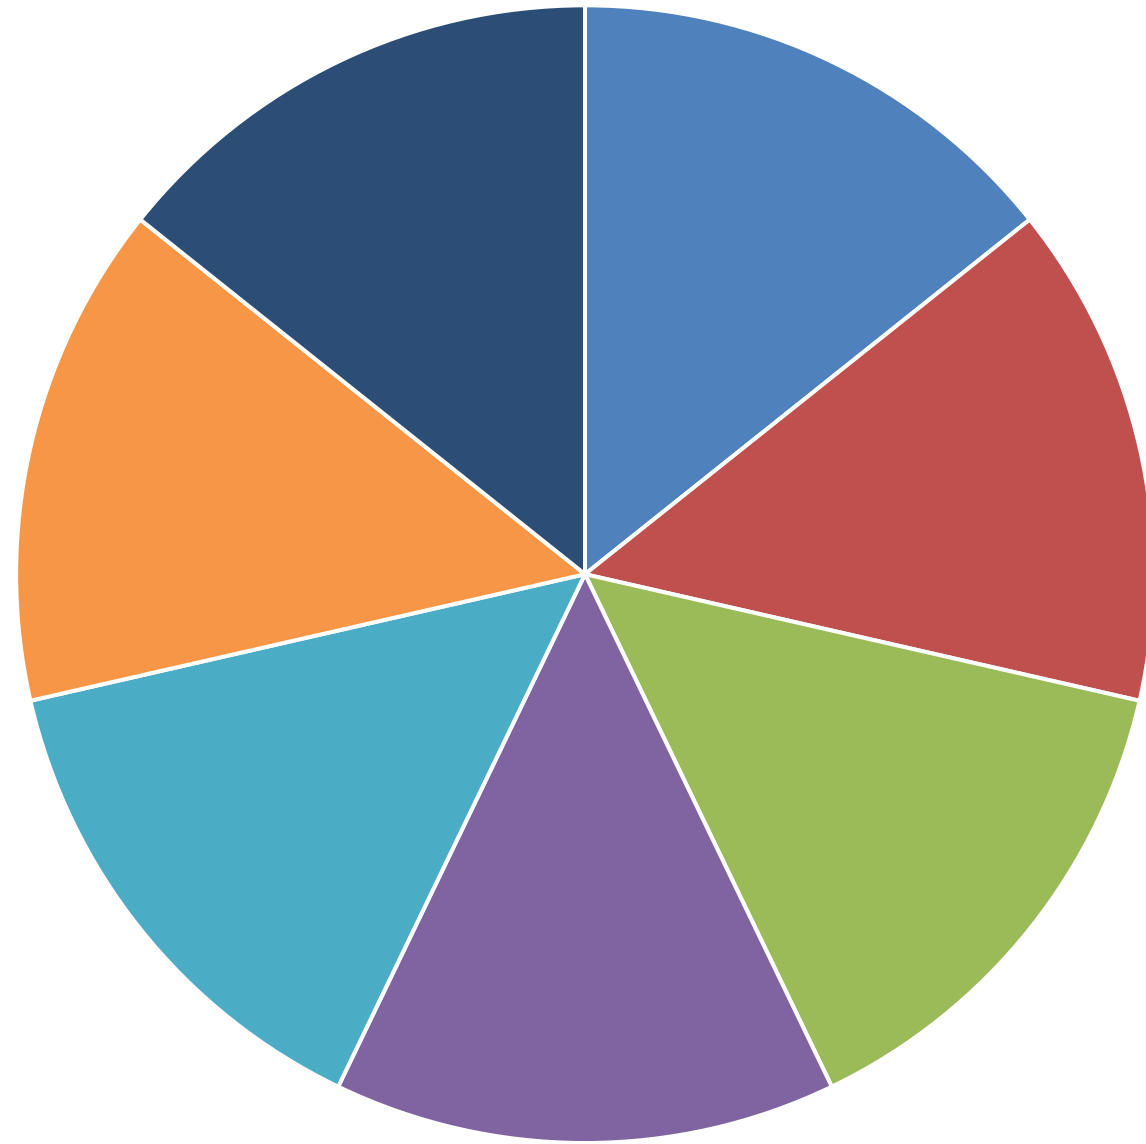

KEY PEOPLE

The Modern System for Software Development values education and the cultivation of expert soft skills among its people. The founder has devised a well-organized strategy to empower employees positively, ensuring the achievement of development targets.

Mahmoud Abd Al Rahman

Mahmoud, with over 20 years of expertise in software industry systems and project management, has successfully led projects across major companies in the Middle East, excelling in team leadership and academic research in various fields. He is eager to apply his skills in a challenging work environment.
